

About Pivot Irrigation

Pivot Irrigation and Pumping has been established as a specialist supplier of the latest in irrigation efficient technology for broadacre agriculture, servicing Northern NSW and Southern Qld.

The business has specialty skills and experience in the design, installation and operation of Centre Pivot and Lateral Move irrigation systems gained over many years of involvement with these systems in broadacre agriculture.

The business provides design, installation and commissioning of Centre Pivot and Lateral Move Irrigation, Pumping Units and associated products. We pride ourselves on offering the best in service and backup with a 24/7 breakdown service. We service all brands of irrigation equipment and provide a complete range of parts from either of our branches.

We are dealers for Valmont who manufacture Valley Centre Pivots and Lateral Moves. They are the largest manufacturer of these machines worldwide and are recognised as the leaders in the field. They offer the best in control technology, reliability and proven year on year performance under Australian conditions. Valley have a distribution warehouse in Brisbane and proven engineering and sales backup available locally.

Advances in irrigation technology is something we are constantly looking at and incorporating the best into what we offer to ensure our customers benefit from the best available technology so we can add value to their operations.

The demands of modern irrigated agriculture require our business to be leaders in the field and provide irrigators with the most efficient systems available. We ensure we will provide irrigators with the best tools to progress their farming business into the future and stand by what we sell for the long term.
