

Towable Pivots

Valley® Towable Pivots set the standard for the industry with our superior structure and computerized controls, all refined and field-proven to provide growers with the most economical way possible to begin using mechanized irrigation.

- Easily irrigate 5- to 300-acre fields (2- to 121.5-hectares)
- Maximize the investment by easily towing the machine between two, three or more fields
- Each machine can be towed from one field to another in less than an hour
- Choose from an on-board engine generator or public power supply
- All four towable options allow the use of any of our pivot panel options

Compare Towable Pivots to Other Irrigation Methods:

- Efficient time management
- Irrigation scheduling versatility
- Less labor-intensive
- More precise water application
- Less wind distortion
- More chemical application flexibility

Towable Machines

2-Wheel E-Z Tow

- Our easiest to use towable
- Excellent for multi-directional towing or part circle applications
- Tongue hitch designed for up to five spans
- Optional power lift for riser pipe

4-Wheel E-Z Tow 6 5/8"

- 168,3 mm
- Suitable for use with 6" low flow spans
- Rated for machines up to 1,000' (304,8 m) long
- Flexible wheel design allows fixed position or swivel option for easy rotation and towing in any direction

4-Wheel E-Z Tow 8 5/8"

- 219,1 mm or 8" (203,2 mm)
- Fixed wheel or pivot option easily rotates to tow in any direction
- Tongue hitch for quick, secure hookup without cables
- For machines up to 1,500' (457 m) long

Skid Pivot

- Low-cost option for infrequent towing
- Designed to tow even the longest towable unit
- Perfect for growers who are looking for supplemental "rain" to protect their investment in seed, fertilizer, and other chemicals
